MYSORE GEOLOGICAL DEPARTMENT.

No. 37

Enc. 1

Bangalore, 29th July 1895.

From

Gen 79-95-1

THE STATE GEOLOGIST.

To

The General Secretary
to the Government of Mysore.

Sir,

I have the honour — herewith to request permission to arrange for the immediate construction of 22 glass table cases with drawers below for the exhibition and storage of the large numbers of specimens that have been accumulated during the past few months, and for the exhibition of the numerous specimen

That Doctor John W. Evans and I myself are preparing to show in

in Loan Collections.—

As soon as the Laboratory branch of the Department moves over to the new building more than half this building could be used as a museum (if the Cases above asked for were available) and the collections already existing and to which daily additions are being made could be rendered extremely instructive to the — Apprentices and to the rapidly increasing section of the Public that takes interest in Geology and Mining work.—

To make my meaning quite clear I enclose a small

Sketch

(1/6)

Sketch of the style of table case required.—.

The estimated cost of a single case will be Rs. 140/-, but if the lot is given on contract to some good Cabinet maker it ought to come to considerably less.

In Conclusion, I have the honour to propose that the Cost of these cases be met by a special grant in anticipation of the establishment of a regular — Museum of Practical Geology, in which both the rough ores and rocks should be shown together and the working up of them into finished products, illustrated by models, a

selection of which should also be exhibited.

The annual grant for ordinary museum purposes made to the Department will be required for many other objects and is not equal to bear such a heavy charge as the provision of these 22 table cases will amount to.

I have the honor to be,
Sir,
Your most obedient Servant.

R. Bruce Foote

State Geologist.

THE STATE GEOLOGIST.

To

The General Secretary to the
Government of Mysore

SIR,

I have the honour to in-
-form you that there is an excellent
English Turning Lathe for Sale at
Messrs Abraham & Co.'s Auction
rooms.

Dr John. W. Evans and
Mr George Lavalle, both of whom
have practical Knowledge of lathes,
talk me it is a very valuable
piece of machinery, and there can
be no doubt it would be an
extremely useful machine in
the mining section of our laboratory

to be used in the preparation of models and apparatus to illustrate the teaching of Mining and for exhibition in the new Museum.

The lathe would be very cheap at the price of Rs. 150/-, but I believe it could be purchased for even a smaller sum, but even if not I would recommend that I be allowed to purchase it for Rs. 150/-

I have further the honour to request to be allowed to spend a sum of Rs. 50/-, or thereabouts, in the construction of a lapidary's cutting and polishing table which is an absolutely essential piece of apparatus for the Geological Laboratory.

I have the honour to be,

Sir,

Your most Obedient Servant

MYSORE GEOLOGICAL DEPARTMENT.

No. 106

Bangalore, 10th October 1895.

From

Gen 28-95-5

THE STATE GEOLOGIST.

To

The General Secretary
to the Government of Mysore.

Sir,

I have the honour to enclose herewith a list of requirements for this Department drawn up in consultation with Dr. J. W. Evans just before he left for England, and to request sanction for the purchase of the articles named, and permission for him to select personally ~~this~~ while at home the more important items set down in the list, as this will ensure their being of the best quality.

2. I have arranged the list so as to show by which section of the Department the various Articles are required, and the list has been drawn up with the strictest regard to economy. Time has shewn that the various articles are essential to the satisfactory progress of work in the several branches of the Department.

3. The ordinary annual grant for the Library, Laboratory and Museum requirements is unable to bear the expense now proposed to be incurred, I have therefore the honour to propose that this be met by a special grant of Eighty pounds (£80.0.0) to supplement the balance now remaining

What is the grant? Please put up the order. J.

Not here. Please refer to DJ. 0 11.08 12/10

in the hands of Messrs Henry. S. King & Co., London, from the original grant of £400/- made last year. This balance amounts to £70/- (or a little over), making with the proposed additional grant a sum of £150. The exact amount of the balance in London, I cannot state just now, as there is a bill for various books outstanding, and the last Statement of the account sent by that firm contained a grave Error and had to be returned to them for Correction, and so could not be submitted to Government.

4. The Cost of each piece of Apparatus asked for is not known, so it could not be set

down in the list; but the total cost of those priced comes to £102-18-4, leaving a margin of a little over £45/- to meet the cost of the unpriced articles.

4. As Dr Evans's stay in England is very limited, I would respectfully request that the proposed additional grant of £80/- be sanctioned at once and remitted by the next outgoing mail through Messrs Lontts & Co., to Messrs Henry S. King & Co. for Dr Evans's disposal.

I have the honour to be,
Sir,
Your most Obedient Servant

R. Bruce Foote

State Geologist.

From

THE STATE GEOLOGIST.

To

The General Secretary
to the Govt. of Mysore

Sir,

With reference to Government order No. 2453-5 / M.37 of the 16th August 1895, sanctioning the construction of 22 glass cases for the exhibition of Geological specimens in this Department and stating that it would be desirable to place the order with the State Artware Department at Mysore if that Department could execute the order as cheaply as any private firm of Cabinet makers, I have the honour to inform you that the Artware Department has constructed a

model Case, but charge Rs. 200/- Each, i.e. Rs. 60/- more than the original probable Estimate. The work is moreover not perfectly satisfactory, and the wood used not sufficiently seasoned. So, Mr. Foote arranged for an Estimate of a similar Case from a local firm to see if the work cannot be done at a less cost, because of dispensing with a quantity of unnecessary ornament of the Cases. Until this Estimate shall have been received and Considered the order for a Whole number of Cases remains in Abeyance, but meanwhile the Case prepared by the Artware Department has been accepted and their bill for Rs. 200/- is now forwarded for favour of Sanction and transmission

to the Comptroller.

Submitted

Secretary these machines are absolutely necessary to enable the Geol Dept to assay Gold Quartz. With ordinary laboratory appliances even a qualitative test of poor quartz is impracticable, while quantitative tests are out of the question. If the Govt. think proper to sanction this branch of our Dept. to be made efficient, we may even make money by charging fees for assaying at the rate of Rupees 20 per ton of Companies quartz.

No. 268

MYSORE GEOLOGICAL DEPARTMENT.

Bangalore, 29th May 1896.

From Cyn 79-95-1

THE STATE GEOLOGIST.

To

The Secretary to the Government
of Mysore,
General Dept.

SIR,

With the object of increasing the Efficiency of this Department in the practical examination of the minerals and ores requiring to be tested on a larger scale than the small laboratory tests now only practicable, I have the honour to suggest the great desirability of acquiring a small number of machines specially adapted for such purposes. For more conclusive tests of the value of ores sent in from the field by the Surveying parties could thus be obtained

and the apprentices would gain a very valuable amount of experience in the art of ore dressing, a branch of mining industry with which they cannot be familiarized too early in their course of training.

The machines which I would now propose purchasing are the following with their approximate cost prices in England:—

1. A 3 Stamp Mill for Crushing Quartz ——— £ 123—0—0

2. A "True Vanner" for separating ores by their Specific gravity £ 83—0—0

3. A "Calumet" Hydraulic Separator ——— £ 29—15—0

4. A "Dodge" Crusher ——— £ 47—10—0

5. A pair of Crushing Rolls for dry Crushing ——— £ 85—0—0

Total £ 368—5—0

A 4 H.P. Oil gas Engine to work the above

These machines will continue useful for many years and by their invaluable practical teaching be of such advantage in training the apprentices that they will be worth far more to the State than their mere first Cost.

As to the importance and desirability of having these pieces of machinery, Dr. Evans and myself are perfectly agreed and I would strongly recommend that their purchase at the earliest possible date be sanctioned.

I have the honor to be,
Sir,

MYSORE GEOLOGICAL DEPARTMENT.

No. 37
Encl. 1

Bangalore, 29th July 1895.

From

Gen 79-95-1

THE STATE GEOLOGIST.

To

The General Secretary
to the Government of Mysore.

Sir,

I have the honour herewith to request permission to arrange for the immediate construction of 22 glass table cases with drawers below for the exhibition and storage of the large numbers of specimens that have been accumulated during the past few months, and for the exhibition of the numerous specimens that Doctor John W. Evans and I myself are preparing to show

in Loan Collections.—

As soon as the Laboratory branch of the Department moves over to the new building more than half this building could be used as a museum (if the Cases above asked for were available) and the collections already existing and to which daily additions are being made could be rendered extremely instructive to the — Apprentices and to the rapidly increasing section of the Public that takes interest in Geology and Mining work.—

To make my meaning quite clear I enclose a small

Sketch

(1/6)

Sketch of the Style of table case required.—.

The estimated Cost of a single case will be Rs. 140/, but if the lot is given on Contract to some good Cabinet maker it ought to come to Considerably less.

In Conclusion, I have the honour to propose that the Cost of these Cases be met by a Special grant in anticipation of the establishment of a regular — Museum of Practical Geology, in which both the rough ores and rocks should be shown together and the working up of them into finished products, illustrated by models, a

selection of which should also be exhibited.

The Annual grant for ordinary museum purposes made to the Department will be required for many other objects and is not equal to bear such a heavy charge as the provision of these 22 Table Cases will amount to.

I have the honor to be,

Sir,

Your most obedient Servant.

R. Bruce Foote

State Geologist.
